

PROSPECTUS

4,200,000 Shares

We are a specialty finance company that provides customized financing solutions to lower middle market companies located throughout the United States, with an emphasis on the Southeast. Our investment objective is to seek attractive returns by generating current income from our debt investments and capital appreciation from our equity related investments. We are an internally managed closed-end, non-diversified investment company that has elected to be treated as a business development company under the Investment Company Act of 1940. Upon completion of the formation transactions described in this prospectus, we will acquire Triangle Mezzanine Fund LLLP, a North Carolina limited liability limited partnership which is licensed as a small business investment company by the United States Small Business Administration. We will operate Triangle Mezzanine Fund LLLP as a wholly-owned subsidiary and initially will make all of our portfolio investments through that entity.

We are offering 4,200,000 shares of our common stock. This is our initial public offering, and no public market currently exists for our shares. Our common stock has been approved for quotation on the Nasdaq Global Market under the symbol "TCAP."

Effective concurrently with the closing of this offering, we will issue 1,416,667 shares of common stock, having an aggregate value based on the initial public offering price of \$21.3 million, to the limited partners of Triangle Mezzanine Fund LLLP in exchange for their limited partnership interests. We will also issue an aggregate of 500,000 shares of our common stock, having an aggregate value of \$7.5 million, to the members of the general partner of Triangle Mezzanine Fund LLLP in exchange for the general partnership interest in Triangle Mezzanine Fund LLLP. The general partnership interest acquired will have no value for purposes of determining our net asset value. The 1,916,667 shares of common stock we will issue will have an aggregate value of \$28.8 million based on the initial public offering price, while our pro forma aggregate net asset value as of September 30, 2006, assuming the exchange of 1,916,667 shares of common stock for all partnership interests on that date, was \$22.7 million. Our pro forma as-adjusted net asset value per share as of September 30, 2006 assuming the acquisition of all the outstanding partnership interests and consummation of this offering was \$80.0 million or approximately \$13.07 per share. Consequently, investors purchasing stock in this offering will incur immediate dilution of \$1.93 per share. See "Dilution" on page 34 for more information.

Investing in our common stock is speculative and involves numerous risks, and you could lose your entire investment if any of the risks occurs. Among these risks is the risk associated with the use of leverage. For more information regarding these risks, please see "Risk Factors" beginning on page 12. Our shares have no history of trading in a public securities market. Shares of closed-end investment companies have in the past frequently traded at a discount to their net asset value. If our shares trade at a discount to net asset value, it may increase the risk of loss for purchasers in this offering.
